

Rabbi Schneider's Prophetic Dream Warns of Darker Days—Are You Ready?

The world is shifting, and now more than ever the Lord is on the move. As history unfolds before our eyes, those with spiritual discernment can see that we are living in prophetic times. In a recent message, Rabbi Kirt Schneider shared a prophetic dream that underscores the increasing turmoil gripping the planet. His vision speaks to the reality of global instability, moral decay, and an impending struggle that will test the endurance of humanity.

In the dream, Schneider found himself aboard a massive warship with hundreds of others, all weary from a grueling mission. The suffering was palpable—lives had been lost, and the journey had left its mark on everyone aboard. Just as relief seemed within reach, an officer entered his cabin and delivered a chilling message: “If you think that was hard, get ready. The next thing is going to be even harder.” This warning, he explained, is not just about personal struggle but a foreshadowing of what is unfolding in the world today.

A Time of Chaos and Evil

According to Schneider, chaos is the first front of evil. “Once the enemy can produce chaos, there’s nothing left in terms of strength and order to hold foundations together.” The breakdown of culture, morality, and institutions is opening the door for a more aggressive form of destruction. He pointed to Oct. 7, when Hamas militants attacked Israel in an act of “pure evil, pure hatred with no respect at all for humanity.”

Unlike past conflicts fought under the laws of war, today's violence targets civilians at concerts, shopping malls, and even schools. It is hatred for the sake of destruction.

Israel stands as a stark example of this growing instability. "We used to be optimistic," an Israeli shopkeeper told Schneider before the war erupted. "But we've tried so hard to find a way of peace with our neighbors, and nothing has worked." Now, surrounded by enemies, Israel faces existential threats from nations like Iran, which openly declares its intent to wipe the country off the map. "It's only a matter of time before one of our enemies is able to pull the trigger," the shopkeeper warned.
