

Spirit-Filled Prophet Says Revival Is Coming to America

We are on the precipice of revival! The revival will be greater than we have ever seen before. It will surpass the First Great Awakening, the Azusa Street Revival and the Brownsville Revival.

I spoke with my friend, John Bates, on recent episodes of *Fire Starter* on the Charisma Podcast Network. John is a prophet and, along with his wife, Shelli, are senior pastors of Freedom Fellowship International, in Waxahachie, Texas. In 2014, John received powerful, detailed vision from God regarding the revival coming to America—along with the four shakings, which will precede the greatest move of God we have ever seen. He feels the time is now to release it.

In his vision, John saw an areal view of a map of the United States. Then he witnessed angels flying out of large church buildings. Then four fogs covered our country. First, a pink fog began rolling from California and covered the entire USA. Then from Canada, a second yellow fog began rolling, also covering the entire nation. The third fog was olive green and began rolling from Washington D.C./New York City and also rolled across the country. And finally, a black fog started rolling from Florida and covered our entire nation.

Still having an aerial view of the USA, John could no longer see the nation because it was covered in black. But next he viewed a revival light penetrating the darkness in a particular region of our country. And from that bright light, John began seeing tiny pin lights piercing the darkness, representing more pockets of revival. Upon closer examination of the pin lights, John saw thousands of believers in the pin lights experiencing the greatest revival this world has not yet seen. Important to note, the Christians who were

experiencing revival were those who had not given up.

Angels flying out of large churches. Pink, yellow, olive green and black fog covering the United States of America. Pin lights of revival piercing the darkness in specific geographic locations of our nations.

Listen to this week's and last week's *Fire Starter* podcast, where John Bates gives a detailed explanation of the symbolism as well as a detailed explanation of the vision, so we can have revelatory understanding of what is transpiring even now in our nation as well as what is to come. {eo}
