

5 Apps to Make Things a Little Easier

Greenelines App Saturday

1. SCRIPTABLE—an automation app that allows you to write short programs (scripts). iPhone or iPad can perform any imaginable task in a single command.
2. PDF Expert by Readdle—Version 6 is an essential app if you read, highlight, sign or fill out PDFs on your phone or iPad. Truly a must-have app if you speak PDF.
3. TIMEPAGE is a beautiful app to keep your schedule looking stress-free. It is a Moleskine App so you will recognize the format. It's the best-looking schedule keeper other than my wife.
4. Vocabulary Builder (Magoosh) is FREE. Quiz yourself every day to learn the 1,200 most important words (Basic, Intermediate and Advanced). Never stop learning.
5. MERGE—A couples to-do list. Beats the honey-do list. Assign to-dos to each other. Look for your color to see what else needs to be done. Keep track of bills and decide on Friday-night dinner options with a vote section. Fun—until you have to do something!
