

Spiritual, Cultural and Political Issues

Since I started the Strang Report a year ago what I write on a weekly basis is a commentary that is more or less in the same style, tone and length of my monthly column in *Charisma*. I'm wanting to shift to give you important information and articles that come into my computer inbox on a daily basis about many of the important issues that are facing our nation from a spiritual, cultural, and political point of view. Comment on this article to let me if you like this new format.
