

Discovery Plus to Premiere 'Most Important Story Ever Told'

Some 2,000 years ago, a young man died on a cross, though He did nothing wrong. His friends, heartbroken and terrified of the persecution awaiting them after His horrific death, desperately searched for a glimpse of hope.

But as we know, hope rose again with Jesus on Easter. In a vivid depiction of this remarkable story, *Resurrection* allows viewers a window into the disciples' journey with the risen Savior.

"We are honored to premiere *Resurrection* on discovery+ and shine a light on perhaps the most important story ever told," says David Zaslav, president and CEO of Discovery Inc.

The film, produced by husband and wife duo Roma Downey and Mark Burnett, releases March 27, 2021, and the creators pray it will be a source of family friendly content. "Faithful audiences crave content that speaks to their faith and values," they say.
