

How Hidden Bible Codes Reveal the Future

Author Roy Reinhold says hidden codes within the pages of Scripture reveal the future. Reinhold says after he retired from the military, the Lord told him to learn Hebrew. As he studied, he began to unlock mysteries detailed in the Bible, known as the Bible code.

“The Bible code is where we take the *Tenach*, or the Torah, the Old Testament text, and we take out all the spaces and punctuation marks, and we’re left with a continuous line of text. We put that in a software program, some people do it by hand. And we create matrices, or grids of rows and columns, and we look for terms that are displayed in there,” Reinhold says.

But that’s just the beginning. Watch the video to see what’s next.
