

Is America on the Brink of a Second Civil War?

Rick Joyner dreamed about America's history—past, present and future.

“It was so dramatic and so important, the content and message of the dream,” Joyner tells Sid Roth. “I felt in some ways that my whole life had been a preparation for receiving this dream, for understanding it and for being able to convey it.”

In the dream, Joyner says he was able to see U.S. history from heaven's perspective.

“And it was very different, radically different,” Joyner says. “We say there's fake news, but there's fake history out there to that's been, I think, colored by prejudices, by political opinions and things like that.”

Joyner says it was also a revelation for God's purpose for our country.

Watch the video for his explanation.
