

Is the Latest Brain Microchip Tech a Demonic, End-Times Marker?

At an event at the California Academy of Sciences in San Francisco, Elon Musk talked about the radical advances his brain microchip company called Neuralink has made since he founded it in 2017. But do these technological advances have a more sinister purpose?

The short-term goals of Neuralink are to treat various, serious brain disorders, such as Alzheimer's and Parkinson's disease and then to move from there to help amputees with advanced prosthetics, quadriplegics by potentially curing paralysis, the blind by restoring sight, and the deaf by restoring the ability to hear. During the presentation, Musk even said that a monkey has already been able to control a computer with his brain and that before the end of 2020 Neuralink plans to equip its first human patient with the brain microchip.

But Musk made it abundantly clear that his overall ambition is to achieve "symbiosis with artificial intelligence," to become "one" with AI.

The church needs to see this through the lens of prophecy. Satan wants a kingdom like God's, so what is he doing? He is creating a demonic parallel to God's kingdom.

"He causes all, both small and great, rich and poor, free and slave, to receive a mark on their right hand or on their foreheads, and that no one may buy or sell except one who has the mark or the name of the beast, or the number of his name" (Rev. 13:16-17).

4 Ways Satan Mimics the Kingdom of God
