

# Netflix to Release New Docuseries 'Babies,' a Scientific Look at the 1st Year of Life

In a largely secular society dominated by pro-choice values, it's unusual to see something like the *Babies* docuseries being released on Netflix on Feb. 21. A celebration of little ones' lives, the series is sure to bring a smile to your face.

"From first breath to first steps, this docuseries explores a decade of groundbreaking science that reveals the emotional and astounding story of a baby's first year of life," Netflix stated in the description of the video.
