

President Calls Attention to 'God and Donald Trump' in Davos

International media, dignitaries and fans swarmed President Donald Trump upon his arrival at the World Economic Forum in Davos, Switzerland, over the weekend. And when one delegate asked the president to sign a copy of my book, *God and Donald Trump*, Trump not only obliged but held up the book for all to see.

The image and video were tweeted and re-tweeted, showing Trump's power to engage with people and that he is a major player on the world's economic stage. When I began getting texts and tweets from friends, I could barely believe it happened. But I'm grateful the book has made its way to Switzerland and into the president's hands.

I am humbled by all this attention for the book. While I've been busy promoting it on various media, we could never have paid for such publicity. It's a "God thing," and I want Him to get the attention, not me. My purpose for writing the book is to put on the record how God is involved in the affairs of men, including elections.

On the same day as the Davos event, ultra-liberal website posted its own review of *God and Donald Trump* by Amy Sullivan titled "Millions of Americans Believe God Made Trump President." The subhead read: "A surprisingly fascinating book explains why."

Amy is a respected journalist. If she found *my* book "surprisingly fascinating" I found *her* review surprisingly accurate in its description of the book.

She termed *God and Donald Trump* "part spiritual hagiography

[biography of a holy person], part Fox News bulletin and part prophecy." She wrote: "It ultimately says far less about Trump than about the charismatic Pentecostals who were some of his earliest religious supporters and now view his election as the fulfillment of God's will."

Sullivan compared the book to the spiritual hagiographies written during the George W. Bush administration about the former president, including *George W. Bush, Faith in the White House*, during his first term. She didn't mention it, but we also published *The Faith of George W. Bush* in 2003, which became a *New York Times* best-seller.

In her review of my book, she writes: "Strang attempts to explain evangelical fervor for Trump and provides a window into the world of charismatics, a subset of evangelical Christians who believe God still speaks to people through prophecies and is still actively involved in arranging the world of human affairs."

According to *The Washington Post*, which made mention of the presence of the book at the forum, Trump is the first U.S. president to attend the World Economic Forum since Bill Clinton in 2000.

All of us at Charisma Media are thrilled and thankful for the attention the president brought to *God and Donald Trump*. But the bigger picture is that President Trump continues to embrace his evangelical supporters and remains on board with the issues that are important to the faithful.

This all comes in addition to his role as a respected influencer on the economic stage for his extensive and successful business background. Those who are realistic about the progress of this country will not deny Donald Trump's hand in furthering the issues that are important to Christians, such as the protection of religious liberties and the defense of life. Real and tangible evidence of a growing economy under

this president's leadership is seen every day in the financial headlines as well.

For more information on *God and Donald Trump*, visit and view the book's video. Visitors to the site can also download a free chapter and order the book. {eoa}
