

Tech Tuesday

5 Greenelines from Apple's Developer Conference yesterday:

1. New Mac Pro to be released. Faster, better, prettier. Most powerful Mac ever. 8th Gen Intel. Expensive!
2. iTunes is going away. The App will be discontinued. It will be replaced with Music, Podcasts and TV standalone apps. Scratching my head.
3. New operating system coming. Catalina. Sweet new feature—use iPad as a secondary display or drawing tablet.
4. New operating system for iPads. The unique system adds more multitasking options. Best news—you can now plug in an external thumb drive, hard drive or camera. We win!
5. New Watch App Store. More good things available. New bands, faces and apps.
