

The Secret to Reaching Your Goal Today

In soccer, the goal is to kick the ball into the goal.

There's something prophetic about seeing nets on each side of a soccer pitch, even before players arrive.

We all know what each team is trying to accomplish. I love hearing an announcer cry out, "Gooooooooaaaaaal!"

Do you have a clear goal today? Do you have an extreme focus on the ball?

I'm sure you have noticed there is only one soccer ball in play during the game. Everyone on the field and everyone who is watching the game is focused on *one ball*.

What if you were on a soccer pitch with seven soccer balls lined up on one goal line? If you kick only one ball every day, you will reach your goal sooner. The other balls must wait.

To score a goal, focus on the one, not the many.

Kick one ball down the field today.
