If you are in crisis, please call 988 or visit . You are not alone.

On the surface, contemporary Christian singer Mandisa was the epitome of success. She became a musical star after her appearance on "American Idol" in 2006, and she won a Grammy for Best Contemporary Christian Album in 2014.

But those who read her interviews or followed her on social media knew she struggled with depression, low self-esteem and weight issues. In 2017 she told ABC News that she had

contemplated suicide. In her 2022 memoir, “Out of the Dark,” the singer admitted that she had been raped, and that her suicidal thoughts were partly due to the death of a close friend who had breast cancer.

Mandisa—whose full name was Mandisa Lynn Hundley—was found dead in her home in Nashville, Tennessee, last Thursday, April 18. She was only 47. Police are still investigating, and a cause of death has not been announced. But in a video she posted a few days before her death, Mandisa candidly talked about her emotional battles, and she admitted she was “in a season of lament” because another close friend had died.
